

Meet an **INNOVATOR**

The Meet an Innovator program series brings together TELUS Spark visitors and incredible people in our community who are creatively solving problems. From renowned artists to scientist and expedition leaders, these individuals inspire us and we know that they'll have you pondering new ideas too!

Each event will be a bit different, so mark your calendars and join in the fun.

July 26
MEMBERS OF THE
CALGARY FIRE
DEPARTMENT

Calgary Fire
Department

Ever wonder what it's like to be a firefighter? Curious to see what really happens on a fire truck? Do firefighters really rescue cats out of trees? Learn about the risks and challenges of firefighting and how investigators use innovative methods to determine the origin and cause of a fire. Meet Calgary Fire Department firefighters and one of their very smart dogs on July 26.

August 23
JEFF DE BOER
AND PARTNERS

Multi-Media
Artist and Maker
Community
Leader

While designing armour is no easy feat, designing the only armour elegantly scaled to fit mice is a rather astounding achievement. Nothing is too small, too big, or unimaginable for this internationally renowned metalsmith and multi-media artist. Jeff de Boer combines cutting-edge technology with fine artistry and design, and you'll be picking your jaw up off of the floor when you experience projects by Jeff and his team of collaborators. You can even try to build something out of metal yourself!

September 27
THE MCCAIG
INSTITUTE
FOR BONE &
JOINT HEALTH

Bone and Joint
Health Scientists

Healthy bone and joint systems keep us mobile and play a pivotal role in maintaining our overall health and well-being. The McCaig Institute for Bone and Joint Health is home to a multidisciplinary team of scientists, engineers, clinicians and health system researchers who have established an innovative, world-class research program to enhance the prevention and treatment of bone and joint conditions to keep people moving! Join the movement and learn about how you can keep your bones and joints healthy and happy.

November 29
BARAN FABER

Owner and
Operator

How can art and transportation have a symbiotic relationship? The BassBus team has answered the call by converting an old school bus into a mobile art platform. Join us to experience a combination of intricate design elements (including a tree stump that acts as an audio input jack and full interior LED lighting!) and cutting-edge technology projecting visual landscapes. What are you waiting for? Get on the bus!

December 27
SUSAN EATON

Founder and
Expedition Leader

Hypothermia, gale force winds, and an array of marine life including polar bears and Greenland sharks are just a few of the challenges that Susan R. Eaton, founder of the 2014-2016 Sedna Epic Expedition, may encounter as she leads a ten-woman snorkel relay of the Northwest Passage. Team Sedna, named after the Inuit goddess of marine mammals, will embark on a 100-day, 3,000-kilometre snorkel relay to document ocean change and its impact on northern communities. Before they begin their epic journey, Susan and some of her team will visit TELUS Spark to share their stories. Dive in this December!
