# THE WOMEN OF THE SEDNA EXPEDITION

In July 2016, ten women will conduct an epic 3,000-kilometre-long snorkel relay of the Northwest Passage, creating global awareness of disappearing sea ice and climate change in the Arctic

Team Sedna's proof-of-concept expedition—to Labrador, Baffin Island and Greenland—departs Nain, Labrador, on July 14, 2014, via ship, traveling up the Labrador coast to Baffin Island, and, across the Davis Strait, to Western Greenland.

Come listen to them speak about this adventure and their own personal journey!
